Response:

1. The examiner is recommended to restrict pending claims again based on different functions and structures in pending claims; the examiner regrets for any delay may cause from this restriction.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-10, 27-36, 41 are drawn to a computer-instructions embedded in a computer-readable medium, (a system containing merely above software product) for matching a seller to a buyer, classified in class 705, subclass 29 (wherein a selecting criteria is available items of different suppliers).

II. Claims 14-23, 42 are drawn to a method for online matching a seller to a buyer based on a nearest location of supplier compared to a buyer (e.g. a pizza delivery service), classified in class 705, subclass 26.

The above inventions are distinct, each from the other because of the following reasons:

- Inventions I and II are related as system/software product and process its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand,

or (2) the system/apparatus (a software product) as claimed can be used to practice another and materially different process.

(MPEP § 806.05(e)). In this case a system containing a software product for doing matching; this same system/software product can be used to perform other type of matching, e.g., a computer system that uses in selecting vendor based on "OFF-THE-SHELL" products (a criteria of available inventory), not necessary for matching with a criteria as "lowest price items" or based on a criteria of "nearest location".

- 3. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
